The Inc. 5000 serves as a unique report card on the U.S. economy. Despite the recession, aggregate revenue among the companies on the list increased to \$214 billion, up \$29 billion from last year, with a median three-year growth rate of 126 percent. The companies included on the Inc. 5000 are responsible for creating more than 1 million jobs since their founding; making the list perhaps the best example of the impact private, fast-growing companies can have on the economy.

"In light of the current economic struggles, this national level achievement is even more rewarding," said Matthew Bucholz, President of Federated IT. "This prestigious recognition belongs to our employees who bring their energy and creativity to the workplace every day."
