**Federated IT ranked in top 5000 Fastest Growing Companies in America**  
*Award marks 3<sup>rd</sup> consecutive year company receives this honor*

**Federated IT Ranks No. 2623 on the 2011 Inc. 5000 with Three-Year Sales Growth of 88%**

Washington, DC – Federated IT announced today that for the third consecutive year, Inc. magazine has recognized it as one of the fastest-growing, private companies in America. Ranking Federated at No 2623 in its fifth annual Inc. 5000 report, the list represents the most comprehensive look at the most important segment of the economy-America's independent-minded entrepreneurs. With this accomplishment, Federated joins the rarified company of enterprises who have appeared on the list multiple times, many of which have grown to become national icons as one of the nation's fastest growing companies.

“Making the list at all is an honor. To have made the list three years in a row shows that our growth is consistent and dependable, and in this market consistent growth is a sign of a healthy and capable company. Receiving this recognition from Inc. magazine validates our strategic plan and reconfirms to our customers and employees that their trust is well placed”, said Matthew Bucholz, president of Federated IT.

Despite the fact that the combined annual growth rate during the measured period of 2007-2010 took place during the heart of the protracted recession, this year's Inc. 5000 companies employ 370,592 people. And with unemployment remaining stubbornly high, policymakers and business leaders will do well to look to the Inc. 5000 companies for fresh ideas on achieving growth and creating jobs.
