FEDERATED AWARDED CONTRACT WITH US NAVAL OBSERVATORY

Washington, D.C. - Federated Information Technologies, Inc. (Federated IT) announced on Monday, August 27th that it will commence work on a 3-year \$3.5 million Prime Contract with the US Naval Observatory.

This exciting project is focused on supporting and maintaining the Master Clock for the Department of Defense. This mission will involve exciting and intensive research to ensure superior service through advanced technology. Federated IT will be providing support in environmental control, power distribution systems, physical security, atomic clocks, oscillators, synthesizers, measurement, distribution, and control systems to ensure that required critical time, astrometry, and geodetic services continue without interruption.

"This is a job that requires a high level of consistent expertise. It is crucial that the Master Clock be maintained for the Department of Defense and in turn for the entire country." said Matthew Bucholz, President of Federated IT "Only the most capable and qualified individuals are suited for this mission and we are confident that the team we have hired is the best for the job."
