FEDERATED IT achieves Certified Veteran Enterprise certification

Washington, DC February 26th, 2013 -- Federated IT is pleased to announce that they have been awarded the Service-Disabled Veteran Owned Small Business certification from the U.S. Department of Veterans Affairs Center for Veterans Enterprise. This V.A. initiative aims to increase employment opportunities for service-disabled veterans in the Federal contracting sector.

For a two year period, SDVOSB certification allows Federated IT to procure special sole source contracts and set asides issued by the V.A. This certification also awards Federated IT the opportunity to participate in the V.A.'s esteemed Mentor-Protégé Program. As a result, large businesses and prime contractors will increasingly seek to partner with Federated IT in their professional endeavors. The V.A. is one of the largest procurement organizations in the Federal Government, annually spending over 3 Billion with eligible Veteran Owned Small Businesses.

"To have this certification is an honor," said Matthew Bucholz, President of Federated IT. "We are grateful to our CEO, Kyle von Bucholz, who was willing to serve our country first in the armed forces and now as an entrepreneur. We look forward to supporting the Department of Veteran Affairs on its many critical initiatives long into the future. "
