## **FEDERATED IT ACHIEVES COVETED MICROSOFT GOLD CERTIFICATION**

**Washington, DC (September 3rd, 2014) — Federated Information Technologies, a private Government Technology Contractor, achieved the Microsoft Gold Certification for Small Business, demonstrating a “best-in-class” capacity to support Microsoft centric customers’ needs in today’s dynamic business environment, distinguishing itself within the top 1 percent of Microsoft solution providers.**

To earn a Microsoft Gold Certification, partners must successfully pass Microsoft Certified Professional exams to corroborate corporate technological expertise, and further designate each MCP to one specific Microsoft competency, ensuring focused manpower capacity within the relevant technology domains.

Each MCP also provides customer references that demonstrate successful project execution, meet a revenue commitment, and pass technology and/or sales assessments.

“This certification showcases our commitment and acute technical acumen surrounding Microsoft products and solutions we leverage to solve the complex challenges of our clients,” said Brad Glasco (Vice President). “We accelerate our clients’ success by serving as trusted Microsoft technology advisors for both their mission and business demands.”

“Microsoft Gold partners demonstrate keen capability and investment in the latest Microsoft technology,” said Phil Sorgen, corporate vice president, Worldwide Partner Group at Microsoft Corp. “These partners are the top 1 percent of our partner ecosystem, which helps customers drive innovative solutions on the latest Microsoft technology. The Microsoft Partner Network innately strengthens corporate capabilities through the collaborative solutions-oriented culture shared across one of the most active, diverse Knowledge Management constructs in the world.
